WARNING

- This product is not a toy and should not be used by children.
- Never use the air compressor in direct sunlight, high temperatures or rain.
- Keep the air compressor away from water and rain. It is not suitable for use in water.
- To prevent damage, excessive heat, toxic fumes, fire or explosion, turn off the air compressor after 10 minutes of use and let it cool down for 30 minutes.
- Always turn off the air compressor after use.
- Before using this product, carefully read all warnings and instructions. Improper use can result in product damage beyond the Seller's responsibility.

ATTENTION!

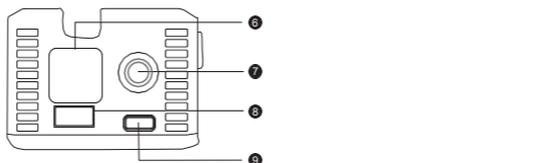

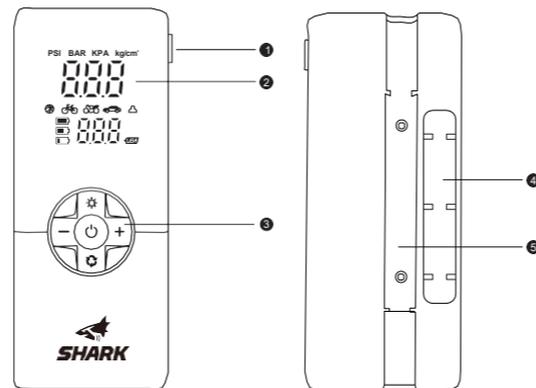

To minimize the risk of electric shock, refrain from exposing your air compressor to rain. We recommend storing it indoors and away from sources of heat and fire. Attention:

1. This product may experience slight heating during normal operation, which is deemed to be a typical occurrence.
2. To prolong the air compressor lifespan, we do not recommend continuous inflating for more than 10 minutes. Should prolonged use be necessary, intermittent breaks are advised to allow the air compressor to cool down.
3. To ensure safety and to prevent injury from bursting of objects as a result of over-inflation, always refer to the user manual or instructions supplied with the object to be inflated to determine the required air pressure before inflating.
4. The air compressor cannot be used while charging.
5. The air compressor and air hose can get very hot after running for a while. Do not touch hot surfaces until they have cooled down.

SPECIFICATIONS

Product name (Product Code)	SHARK BP-150 (800-BP-150)
Product	Automatic portable cordless air compressor
Product material	ABS & Metal
Battery voltage	DC7.4 V
Air flow	18 l/min
Noise	<85 dB(A) from 1,5 m

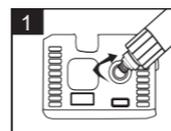

PRODUCT OVERVIEW

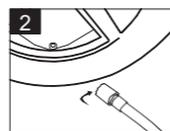

- 1 Deflation button
- 2 Digital display
- 3 Operation buttons
- 4 Air nozzle compartment
- 5 Air hose compartment
- 6 LED light
- 7 Air hose connection
- 8 USB output (when used as a powerbank)
- 9 USB-C charging port

INSTRUCTIONS FOR USE

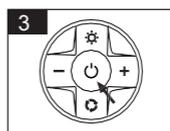

Note: Charge the air compressor fully before use.

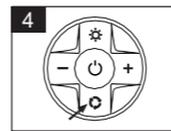

Connect the air hose to the air compressor.

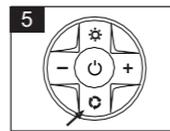

Connect the other end of the air hose to the tire valve.

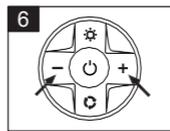

Press and hold the "Power" button to wake up the air compressor.

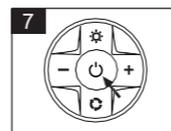

Press and hold the "Mode" button to select preferred pressure units.

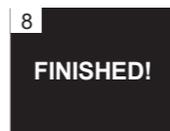

Press the "Mode" button to select inflation mode "PSI BAR KPA kg/cm²".

Press "+" or "-" button to preset the tire pressure.

Press "Power" to start the air compressor.

The air compressor will automatically stop when the desired pressure is reached.

Package contents

Presta Valve adapter

Ball needle adapter

2 Nozzle adapters

Charging cable (USB-C)

Storage pouch

INFLATION MODES

Balls

Bicycles

Motorcycles

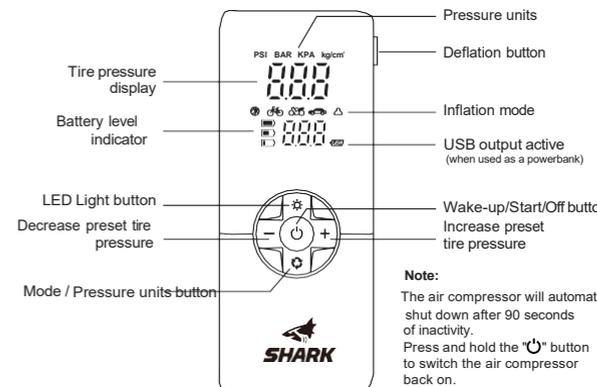

Car Tires

Custom mode

TIRE PRESSURE PRESET

Press and hold "Mode" button to change pressure units. Use the "+" or "-" buttons to set the required pressure, wait a few seconds for the numbers to stop flashing, then push the Start button "Power" to start inflation. Air compressor will automatically stop inflating when it reaches the preset pressure level.

Note:

The air compressor will automatically shut down after 90 seconds of inactivity. Press and hold the "Power" button to switch the air compressor back on.
